

3D MOTION CAPTURE SYSTEMS

- **Hardware Excellence:** High-speed, high-resolution, and hybrid tracking capabilities set Simi apart.
- **Wireless Innovation:** Simi introduces the only Wireless 3D Markerless Capture Technology, providing freedom of movement without the constraints of cables.
- **Custom Configurations**
- **AI-Powered Motion Analysis:** Markerless 3D Motion Capture data, enhancing accuracy and complexity.
- **Hybrid Tracking:** Simi's hybrid systems seamlessly integrate Markerless and Marker-Based algorithms, offering the best of both worlds without changing camera modes.
- **Simi Shape App:** Revolutionize your 3D Movement Analysis with Simi's app, providing slow-motion video feedback,
- **Intelligent Movement Analysis:** Makes 3D Motion Capture easy for clinical and sports biomechanics, enabling detailed analysis, high-quality video
- **Versatile Reporting:** Data visualization and reporting.

LASER ASTHETIC

CANADIAN PIONEER MEDICAL TECHNOLOGY

- Canadian Manufacturer & Design & Services & Sales of Cutting-Edge Aesthetic Laser Machines
- FDA cleared (510k) products
- Quality Assurance Certificates
- MDSAP Certificate
- ISO 13485:2016

PERFORMANCE STATUS MONITORS

Medtronic

- Benefits that Matter:
- Live Monitoring: Configure thresholds for real-time management of training intensity.
- Individual and Team Reports: Analyze and compare athletes, track improvements, and fine-tune training plans.
- Kinematic and Physiological Metrics: Measure explosiveness, acceleration, and various physiological indicators.
- Detection of Anaerobic Threshold: Monitor fitness and tailor training based on individual anaerobic thresholds.
- Heat Stress and Fatigue Monitoring: Use estimated core body temperature and other metrics to prevent heat stress and manage fatigue.

RESPIRATORY MUSCLE TRAINER

Medic Plus

POWER breathe

KH2

- Lowest Entry-Level Load
- Ideal for Weak Breathing Muscles
- Enhances Strength and Stamina
- Drug-Free Solution
- Medical Professional Recommended
- Ergonomic Design
- Achieve results with just 30 breaths, twice a day.
- 5 to 200cm H2O.
- Up to 150 breaths for respiratory muscle training.
- Assess maximum Inspiratory Pressure and Peak Inspiratory Flow.

BODY COMPOSITION ANALYSIS

charder

- Body Composition
- Muscle Measurements
- Obesity Analysis
- Body Type Analysis
- Muscle Fat Analysis
- Segmental Analysis
- Muscle Quality Assessment
- Fitness Parameters
- Health Score
- Control Guide

U310

CRYOTHERAPY

Iceberg Cryonick Roller

VACUACTIVUS MEDSTARCOM

Antarctica Electric

- relaxes muscles,
- makes your skin plump and muscles lean,
- removes fat deposits precisely,
- supports the skin in its barrier function
- softens fat layer
- restores capillary capability,
- restores the elasticity
- reduces swelling,
- relieves pain.

- Chronic pain relief
- Reducing inflammation in the body
- Relaxing muscle tissue
- Restoration after workouts
- Increasing joint flexibility
- Strengthening bones
- Boosting immune response
- Smoothing anxiety and depression
- Improving brain function

VO2 MAX SYSTEM

METAMAX 3B
MOBILE VO2 Max

- Portable Breath-by-Breath System
- Internal battery for 12-hour running time (optional)
- Bluetooth® LE for HF, SpO2, and power meter connectivity
- Interfaces with various ECGs
- USB/Bluetooth® connection to PC
- Front display with LED indicators
- Push-pull connectors prevent damage
- Minimal maintenance required
- Long calibration intervals
- Durable O2 sensor
- Constant and dynamic flow control

- Ultra-lightweight: 580g for maximum mobility
- Extensive Telemetry: Over 1,000m range with Bluetooth® technology
- Versatile Carrying: Chest and back carrying system
- Smart Control: Convenient control via Smart Control, laptop, or standalone
- Long Battery Life: 6 hours of continuous operation
- Ample Data Storage: Store up to 400 hours of data
- Dynamic Flow Control: Ensures constant and dynamic flow
- Custom Audio Signals: Freely definable audio cues
